

Roblon High Voltage Pulling Rope

For pulling high-voltage overhead lines over long spans and distances in environments up to 800 kV.

For working live line

Key Features:

- > Non-conductive, even under wet conditions
- > Does not corrode
- > Torque-balanced
- > Lightweight
- > Voltage-tested (test report available)
- > Can be supplied with spliced eyes
- > Splicing and inspection instruction available

IEC 62192
APPROVED

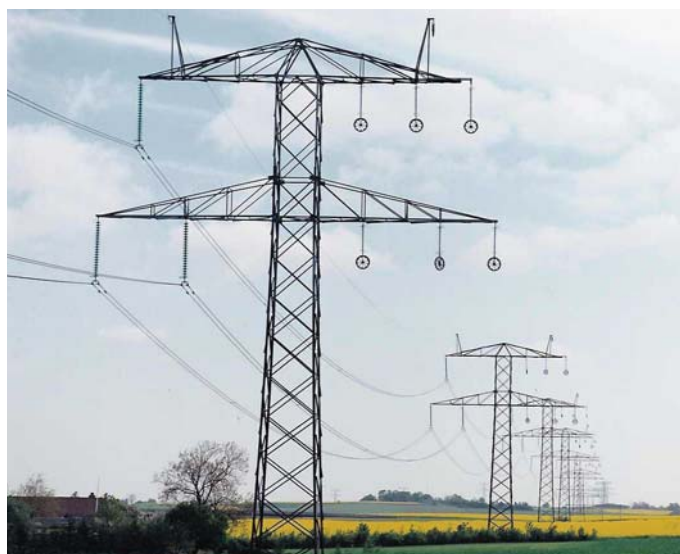

Roblon High Voltage Pulling Rope

Technical data

Diameter (mm)	Min. breaking strength (kN)	Weight per metre (g)
9.00	35	68
13.85	85	153
20.00	200	221

Dimensions and breaking strengths can be customized to meet special requirements

One transmission line is ready for stringing, whilst the other is live
